

Minecraft Mod: nullExistance

Core Concepts

This mod introduces a character selection system that grants players unique abilities. Once a character is chosen, the decision is permanent for that world.

Characters

1. MemaroX

- **Abilities:** To be determined.

2. GiXo IV

- **Ability: Midnight Empowerment**
 - As the in-game time approaches midnight (18000 ticks), GiXo IV's strength increases.
 - The strength bonus peaks at midnight.
 - The strength bonus decreases as the time moves away from midnight.

Character Selection

- Upon entering a world for the first time, the player will be prompted to choose a character.
- The chosen character is bound to the player for the lifetime of that world.
